Very stylish exclusive Qlima Design: This dehumidifier is part of an exclusive range of Qlima design dehumidifiers. The glossy white colour together with the colourfull blue indication ring presents this model as a revelation in high end aesthetics for household dehumidifiers.

Extremely quiet: In HIGH fan mode: the sound produced by this dehumidifier is so low you will hardly hear it, when using it in a normal living room. This dehumidifier surely is one of the most silent dehumidifiers available in the current market.

Hygostat: The humidity can be regulated via an adjustable hygostat.

Large size, removable water tank: For ease of use, the dehumidifier has a extremely large watertank capacity. The frequency of having to empty the tank is significantly reduced, with this large sized water tank.

Automatic switch off: When the water container is full, a red LED will light up together with a short acoustical signal. The dehumidifier will automatically switch off.

Fan speed: A single-speed, high-capacity radial fan. For quiet and efficient operation.

Electronic display: The unit is equipped with an electronic display (LED).

Power cord storage: The dehumidifier is provided with an easy to use power cord storage option.

24 hour timer: The unit is equipped with a timer function which can switch off the unit at any hour.

Convenient mobility: The unit is equipped with top handle at the top back of the unit.

Wheels: For extra convenience the dehumidifier is equipped with castors.

Compressor: The dehumidifier has a silent rotary compressor.

Defrost function: The unit is equipped with an intelligent defrost system, for use in lower temperatures.

Full colour box: The unit is delivered compleet with auxiliary parts within a full coloured box, displaying the applications and operation information in several languages.

Hygrometer: The unit is equipped with a hygrometer, which indicates the relative humidity in the room.

Possibility for permanent water drainage: By fitting a flexible water drainage tube a continuous water discharge can be realized. If done correctly, it will prevent the need for emptying the water container.
